

Protect your investment.

Prevent downtime. Increase peace of mind.

Maintain your equipment with A-dec CARE kits.

The A-dec Difference means designing dental equipment with a focus on detail, and engineering that ensures simple maintenance for years of service. Part of that longevity, includes protecting your investment with periodic inspection and the replacement of wear items—just like any equipment.

A-dec CARE preventive maintenance kits were designed to make upkeep intuitive, and work across multiple product families. And, when used in conjunction with A-dec's 70-point Preventive Maintenance Checklist, you can keep each operatory working at peak performance.
