

W&H: The Leader in Handpiece Innovation.

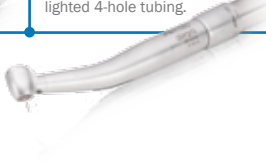

For more than 125 years, W&H has been setting the standard with new technology and innovative product development. Today, the exclusive A-dec | W&H partnership co-develops the world's most advanced handpiece systems and small equipment integration, with a shared commitment to quality, reliability and excellent service.

- Quality Product:** A-dec | W&H handpiece systems are engineered for optimal power, precision, and control, for each specific application. Precisely balanced for perfect feel, you can focus on what matters most: your patient.
- Backed by Warranties:** A-dec | W&H products are backed by some of the best and longest warranties in the dental industry: two years for Synea and one year for Alegra handpieces. Authorized repairs are warranted for a full year, not simply the remaining warranty period.
- Free 5-Day Trial:** Experience the superior quality and performance of A-dec | W&H handpieces for yourself. Select up to two handpieces for a free 5-day, hands-on, hassle-free trial at: www.TryA-dec.com

Milestones in Handpiece Development

<p>1890</p> <p>W&H becomes the first European manufacturer of mechanically operated hand and contra-angle handpieces.</p> 	<p>1979</p> <p>W&H introduces 360 degree coupling and the world's first push-button chucks for turbines, immediately simplifying the process of changing the bur on the instrument head.</p> 	<p>1992</p> <p>W&H introduces the Assistina, a cleaning and care device that is both simple to use and very cost effective. The new product allows fully automatic oil service and complete cleaning of spray channels for the first time ever.</p> 	<p>2007</p> <p>W&H becomes the first dental equipment manufacturer to introduce turbines with sterilizable LEDs to the market with Synea handpieces.</p> 	<p>2009</p> <p>W&H introduces LED light from non-lighted 4-hole tubing with a unique self-generating turbine. These Alegra handpieces connect seamlessly to non-lighted 4-hole tubing.</p> 	<p>W&H develops the smallest electric motor available, the EA-53, which seamlessly integrates into A-dec delivery systems with controls integrated into the touchpad. Up to two motors can run off one controller.</p> 	<p>2014</p> <p>W&H achieves a technological sensation: five powerful, pinhead-sized LEDs integrated in a ring shape, surrounding the burr on the Synea 500 turbine.</p>

What goes into a best in class partnership?

With more than 170 years of combined dependability and dedicated support, A-dec and W&H have a mutual vision of improving the daily lives of dental professionals worldwide.

Shared values.

W&H Philosophy: People have priority. Our focus is based on customer benefits with innovative products and services by focusing particularly on the requirements of the customer and offering pioneer solutions for them.

The A-dec Way: Our philosophy is a commitment to strive for excellence in all we do. No detail is too small to qualify for attention. Quality is everyone's responsibility. There is no such thing as "almost" fair or "almost" honest.

Strength in numbers.
